

Company Overview

Piramal Water, established in 2008 and part of the Piramal group of companies, provides affordable, accessible, pure water to everyone throughout India. Operating through its franchise network, Piramal Water supplies clean water to cover 1,00,000+ people on a daily basis. This year, Piramal Water plans to reach a total of 3, 00,000 people, by leveraging its highly effective business model and provisionally patented technology. Among various other awards and recognition received over the past couple years, Piramal Water has been declared as the 6th most innovative company in India by Fast Company.

Role and Responsibilities

Database Administrator at all levels to support our fast growing ERP System. The database administrator (DBA) is responsible for the design, implementation, maintenance and repair of database. The role includes the development and design of database strategies, monitoring and improving database performance and capacity, and planning for future expansion requirements. They may also plan, coordinate, and implement security measures to safeguard the database. They need to be flexible for the dynamic changes in a fast-paced, creative, and cooperative business environment.
